Heat & Light
Reflection on
all colours!

Roller blackout whiteback fabric range for public and corporate use.

- Exterior uniformity
- Increased solar reflectance
- Superior blackout qualities
- Fire retardant

YewdaleDefiant® eden blackout WB

shading efficiency

Transmittance is the amount of light and heat transmitted beyond the fabric. The lower the amount, the greater the efficiency.

Block/reflect is the amount of heat and light that is blocked or reflected. The higher the amount, the greater the efficiency.

Absorption is the amount of heat and light absorbed in the fabric. The higher the amount, the lower the efficiency.

Ultraviolet protection illustrates how protective the fabric is against ultraviolet rays. The higher the amount, the greater the effectiveness.

Shading Co-efficiency is tested using a single 6mm glass glazing system with and without a blind to obtain solar heat gain measurements. The heat gained with a blind at the window is divided by the solar heat gained without a blind at the window, giving the Shading Co-Efficient. The lower the result the better the performance of the blind at blocking solar heat.

YewdaleDefiant® eden blackout WB

YewdaleDefiant® Eden Blackout White Back fabric is a simple way to achieve exterior uniformity whilst allowing for individual colour schemes within. The white acrylic foam coating on the back blocks sunlight from entering, casting the room into darkness. It is fire retardant, odourless and comes with a lifetime warranty. Another benefit of having a white backed fabric is the increased levels of solar reflectance which reduces interior heat levels and protects furniture in the room whatever colour is chosen. The colour fabric front directly pairs with the Eden Blackout Colour Backed range and matches selected colours in the Eden Daylight fabric range, helping to maintain continuity across spaces that require different yet coherent levels of shading.

Fabric Composition: 100% Polyester
Fabric Range: 10
Roller Fabric Width: 2000mm
Roller Fabric Length: 30m
Fabric Thickness: 0.48mm
Fabric Weight: 390 g/m²
Fire Retardancy: Conforms to BS5867, Part 2: Type B 2008

Shading: Blackout. Suitable for computer environments

Moisture Resistance: Suitable for moist conditions

Colourfast: Conforms to BS5867 – 1: 2004 for lightfastness when tested in accordance with ISO 105-B02:1999

Care Instructions: Wipe with damp sponge. Do not tumble dry; Do not dry clean; Do not iron

this fabric range comes with a full **LIFETIME** Warranty as standard.
